

# Stair Tread Building Guidelines

Use Nexwood 2x6, 5/4x6 Radius Edge, or 5/4 T&G deck boards to build the stair section leading to and from your Nexwood deck. These installation guides are based on ICC requirement and building codes. NOTE: When attaching 2x12 wood stringers to the rim joist, remember that 2x6 Nexwood board can span up to 18", 5/4x6 REB and 5/4 T&G up to 16". The middle stringer is required for stairs that are wider than 36" (2x6), or 32" (5/4x6 REB and 5/4 T&G).
